May 28th, 2020 - an interesting puter security project has been underway at wake forest university they have been developing threat detection software that mimics the behavior of ants about a decade ago i read the book *turtles termites and traffic jams explorations in massively parallel microworlds plex adaptive systems* which among other things went into detail about the pheromone trail left by'

'self anization

november 8th, 2019 - self anization also called in the social sciences spontaneous order is a process where some form of overall order arises from local interactions between parts of an initially disordered system the process can be spontaneous when sufficient energy is available not needing control by any external agent it is often triggered by seemingly random fluctuations amplified by positive feedback''
